

Backend-leaning Software Engineer with 4+ years of experience designing, building, and maintaining production-grade systems — from relational database architecture to deployment pipelines. Currently the lead engineer and systems architect of a live ERP/MES platform running daily business operations, and previously built backend financial services for 70+ active B2B clients at a fintech/accounting startup. Comfortable across the full delivery cycle — API design, data modeling, containerization, and CI/CD — with a strong focus on reliability and end-to-end type safety. Available for full-time and contractor remote roles worldwide, with availability aligned to US/EU time zones.

CORE COMPETENCIES

Backend	TypeScript, Node.js, NestJS, Go, PHP, RESTful APIs, Event-Driven Architecture, Microservices patterns
Frontend	React.js, Next.js, Vite, Tailwind CSS, State Management
Data & Databases	PostgreSQL, MySQL, Redis, Relational Modeling, Transactional Isolation (ACID), Complex Migrations
Testing & Quality	Jest, Vitest, Playwright, E2E & Integration Testing
DevOps & Cloud	Docker, GitHub Actions (CI/CD), AWS fundamentals, Linux environments, Git

EXPERIENCE

Software Engineer / Systems Architect
Retífica Exacta de Motores

Nov 2023 – Present (2 yrs 11 mos)
Imperatriz, Brazil · Remote

- Lead end-to-end architecture, development, and maintenance of an operational ERP/MES platform digitizing machining workflows, logistics, inventory, and billing for a live manufacturing business.
- Architected normalized PostgreSQL schemas with 70+ transactional migrations and strict concurrency controls for multi-stage work orders and payments.
- Built high-responsiveness internal tooling and mobile/tablet interfaces for workshop mechanics, integrating Web Push notifications and offline fallbacks.
- Implemented automated billing calculations, commission engines, and live audit logging to eliminate operational blind spots.
- Also responsible for day-to-day business operations, giving direct, first-hand exposure to how engineering decisions affect real financial outcomes.

Stack: TypeScript, Node.js, Go, PostgreSQL, Docker, Tailwind CSS, REST APIs, HTMX

Backend Software Engineer
Otimizzei

Dec 2021 – Oct 2023 (1 yr 11 mos)
On-site

- Owned backend services powering core accounting and taxation workflows for 70+ active B2B clients across retail and service sectors.
- Maintained relational database schemas and optimized complex SQL queries for heavy fiscal reporting and reconciliations.
- Developed resilient background jobs, data sync routines, and external API integrations ensuring high accuracy and financial consistency.
- Collaborated in an agile engineering team delivering weekly deployments with automated regression tests.

Stack: Object-Oriented Backend Development, SQL (PostgreSQL/MySQL), RESTful APIs, Git, Docker

Software Engineering Intern
Motoca Motores Tocantins

Oct 2020 – Nov 2021 (1 yr 2 mos)
Imperatriz, Brazil

- Completed development tasks under senior engineering mentorship, contributing to internal ERP tools and inventory management routines in a live enterprise environment.
- Built data query optimizations, fixed critical defects in relational databases, and created internal productivity scripts.

Stack: OOP, SQL, Git, Linux, Web fundamentals

EDUCATION

IFMA — Instituto Federal do Maranhão

Feb 2019 – Oct 2025

B.Sc. in Computer Science
